1 x New vertical mixing tanks in AISI 316 stainless steel of 1330L with electrical heating

This standard tank from our stock was equipped with 16kW electrical tracing to bring a product from 15 ° C to 80 ° C in 2.5 hours.
Insulation and a screwed decorative plate were provided around the tracing, we can also offer welded decorative plate.
A 4kW agitator was also placed on the tank with an alabnet axial / radial impeller and a semi anchor in combination with 3 baffles.
